

Proposition 84 Statewide Park Program – Round One

City of South Gate

\$2,000,000

State Street Park

This project will add 4.60 acres to expand Cesar Chavez Park in the City of South Gate, to include new playgrounds, decomposed granite exercise trail, outdoor exercise equipment, basketball half courts, shade structure, picnic tables, concrete walking path, parking lot, landscaping, lighting, irrigation, and restroom building.

Through community based planning meetings, youth, seniors, and families selected these features. Additional design ideas from residents to be included in the project are:

- Have a separate play area for small children with shade protection.
- Do not place interlocking pavers near small children's area. Include park lighting
- Expand the native plant display and create an interpretive garden. Place native plants in a central area.

The project will include these sustainable techniques:

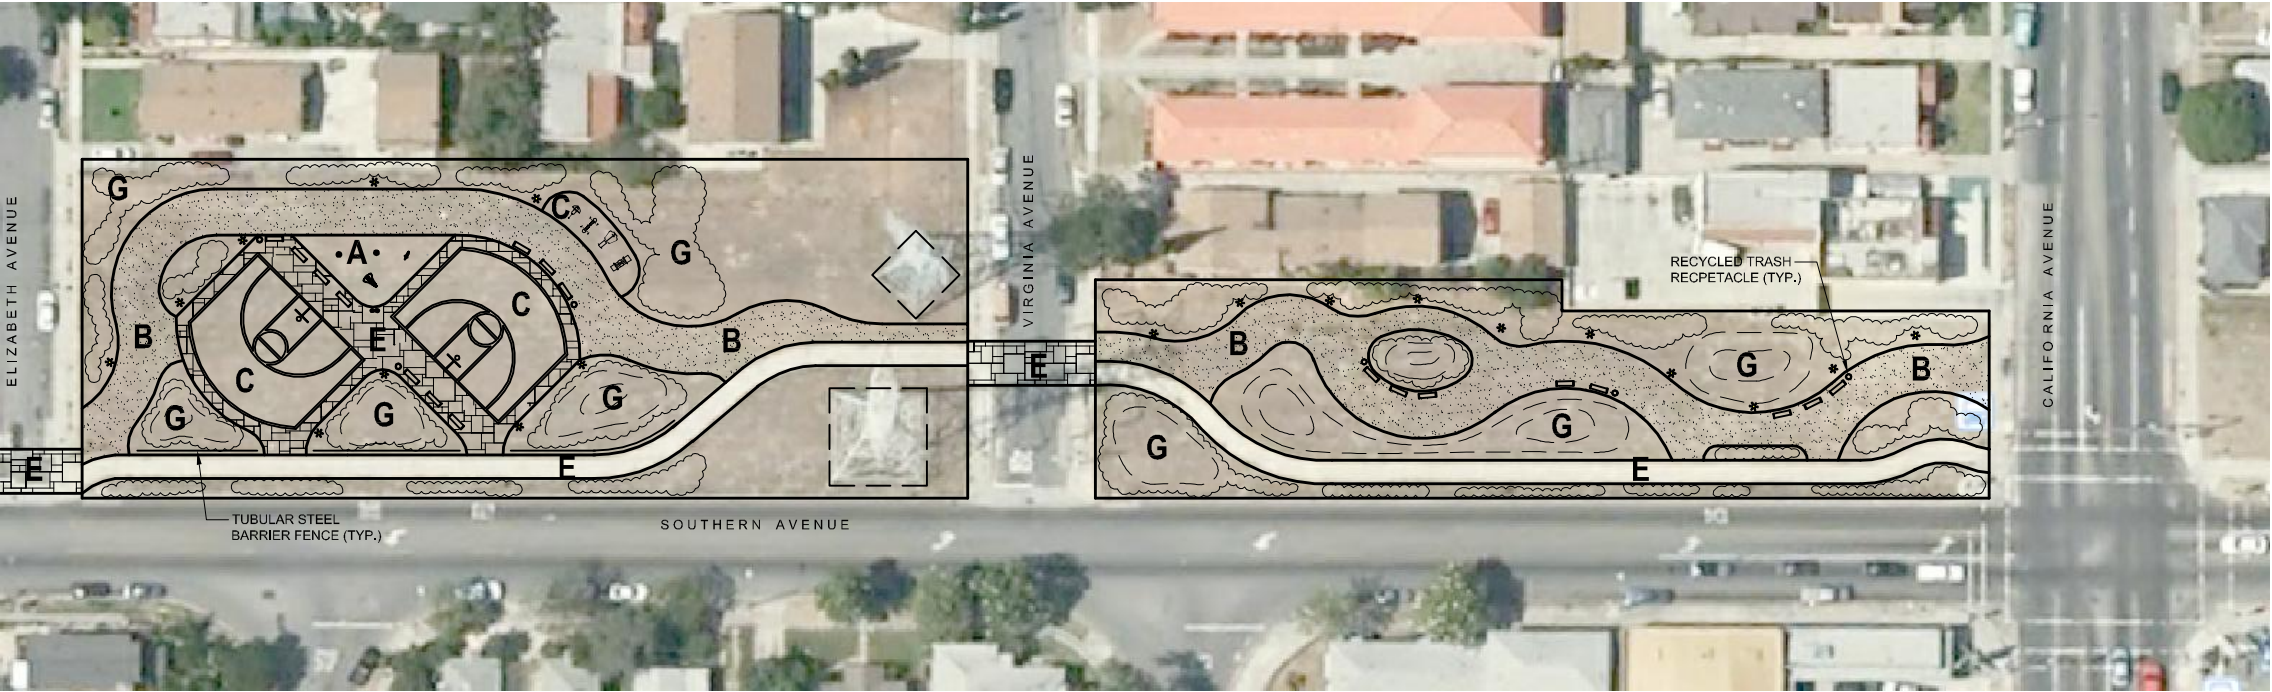

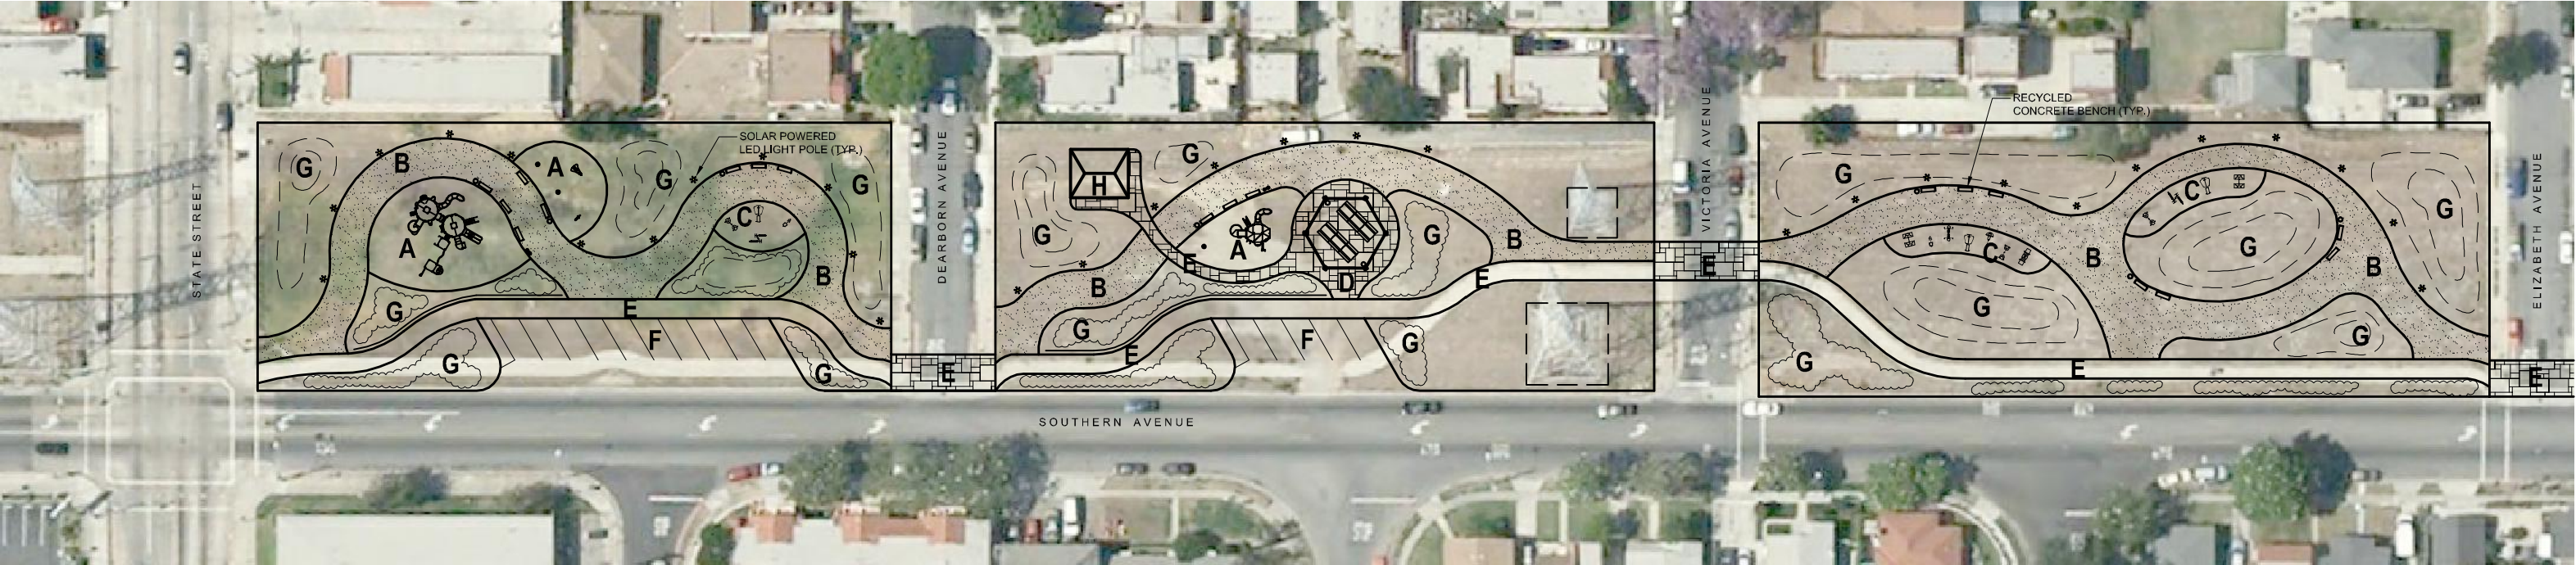

- Use advanced irrigation controller with rain sensor and soil moisture meter.
- Use bio-swales.
- Separate and recycle construction debris.
- Use native, drought tolerant, non-invasive plants.
- Use solar powered, LED lighting, pervious pavers, D.G., permeable rubber play surfaces, low flow plumbing fixtures.
- Create green belt and trail for non-motorized commuting from neighborhoods to schools and workplaces

The park will be open daily from 8 AM to sunset. No entry or membership fees will be charged for park use.
